

CLAIRE WANG

Waltham, MA • clairew@brandeis.edu • claire-yq.github.io

EDUCATION

Brandeis University

Waltham, MA

M.S. in Computational Linguistics (GPA: 3.96)

(expected) May 2027

- Merit Scholarship and Dean's Scholarship recipient

Northeastern University

Boston, MA

B.S. in Computer Science & Mathematics (GPA: 3.84)

May 2023

- Honors Program scholar, National Merit Scholarship recipient

RESEARCH EXPERIENCE

Brandeis University – Broadening Linguistic Technologies Lab

Waltham, MA

Research Assistant

Nov. 2025 – Present

- Develop tutor chatbot for CS course: construct web interface using Open WebUI, engineer system prompt and conduct extensive testing to refine it, generate synthetic data and use it for reinforcement learning via Unsloth
- Review 50+ papers on using LLMs for named entity recognition and draft survey paper proposal synthesizing their findings
- Compile named entity recognition datasets, write scripts to convert them to a standardized format, and check them for validation errors

Northeastern University

Boston, MA

Research Assistant

June 2020 – Dec. 2020

- Reviewed 30+ papers on risk assessment algorithms and analyzed their findings in a literature review
- Drafted survey questions gauging respondents' perceptions of using algorithms to guide judicial decisions

PROFESSIONAL EXPERIENCE

Wood Mackenzie

Boston, MA

Software Engineer I

July 2023 – May 2024

- Built and enhanced frontend widgets and backend endpoints for a platform providing energy data
- Created AWS Glue data migration pipeline, then reduced its runtime by over 80%
- Conducted investigations and produced reports on how to architect new features
- Mentored intern: onboarded him and guided his development through pair programming and 1-on-1s

Whoop

Boston, MA

Software Engineer Intern

Jan. 2022 – July 2022

- Developed features to improve membership management experience and reduce churn
- Reduced technical debt by migrating legacy code to a newer repository
- Wrote documentation on web accessibility and presented recommendations for improvement

PowerAdvocate

Boston, MA

Software Developer Intern

Jan. 2021 – July 2021

- Orchestrated and automated complex data transformations and migrations using AWS
- Was acknowledged by CTO for solving data pipeline issues and fostering relationship with a local university

TEACHING EXPERIENCE

Northeastern University

Boston, MA

Teaching Assistant, Khoury College of Computer Sciences

Sept. 2022 – Dec. 2022

- Held weekly office hours to assist students with homework problems
- Answered students' questions on Piazza
- Collaborated with professor and other TAs to grade assignments and exams

SKILLS

Libraries/Tools: Hugging Face, Unsloth, Scikit-learn, NumPy, Pandas, Git**Languages (Coding):** Proficient in Python, Javascript/Typescript
Familiar with Bash, HTML/CSS, SQL, Java**Languages (Human):** Mandarin Chinese (intermediate), French (intermediate), Spanish (beginner)
